Solar Powered – Compactors

Solar panels Up to 100% of power requirements*- durable for life of the compactor

Single Phase 2 DC motor battery powered

- AGM (absorbent glass mat type) Batteries
 - RJ-250SC uses 4 batteries - Baler & VIP use only 2
- *110 VAC backup charger used to charge batteries when needed*

5 HP - Performance comparable to 10 HP

- Cycle time, force & ram face pressure - same as standard machines
- Suits average compactor requirements - compacts 20 yards/hour
- Not recommended for continuous cycling – max. 9 minutes per hour

Low impact, non-abrasive Rubber Wheels

- Reduce impact & surface wear - quiet operation

Environmentally friendly biodegradable hydraulic fluid

- Soy-based oil readily available – equal performance to petroleum
- No adverse effect on seals - Non-hazardous spills clean up
